WORK EXPERIENCE

Researcher

Equarus LLC

November 2022 - December 2023

(1 year, 1 month)

Responsibilities:

- Spearhead research initiatives for new product development, focusing on market trends, competitor analysis, and consumer insights.
- Actively translate research outcomes into actionable product features, contributing to the innovation pipeline.
- Conduct in-depth research to identify and develop solutions for key operational areas, including customer service and inventory management.
- Utilize advanced data analysis to interpret datasets, providing strategic insights for informed decision-making.
- Collaborate with multiple departments to ensure research aligns with and supports broader organizational goals and challenges.

Achievement:

- Achieved top 15 best-seller status for 5 products in 2023, showcasing effective product strategy.
- Successfully built an automated customer service system on the website and through messaging, utilizing tools like Zapier and ChatGPT.
- Developed a comprehensive inventory management and forecasting system using Inventory Planner software, enhancing operational efficiency.
